- 3.5 years in DSA mentoring
- prev interned at Microsoft

DSA the right way?

Data Structure and Algorithm

↓
way of organizing your
data.

↓
steps to reach a solⁿ.

shelf

timings 8 pm - 11 pm } 15 min }

Module 3 topics

- o Stack → 4
- o Queue + Stacks → 2
- o Binary Search → 3
- o Hashing → Hash Set → 4
 → Hash Map
- o Binary Trees → 4

17 lec

Stack { linear data structure }

- o Arrays
- o Array list -
- o Linked list
- o doubly linked list -
- o String

Stack: keep one above each other

Last dish washed will be the first to be used.

LIFO

↳ Last in, first out -

add 10 to the stack
add 20 to the stack
add 15 to the stack
add 50 to the stack

remove() \rightsquigarrow 50

remove() \rightsquigarrow 15

Methods in Stack

Stack <E> st_name = new Stack();

Generic
↳ Wrapper classes / User defined classes

Method

push() : adds element to the topmost pos of Stack

pop() : removes element from the topmost pos of Stack

peek() : tells the topmost element of the stack

size() : tells the size of stack
